0 Pci Card DriversI had a hackintosh for two years, build from refurbished components, I used the Tonymacx86 method to install Yosemite, El Capitan and Sierra.. Reading this discussion, I see that she says that npci=0x3000 with cause issues with the lan kext.. The old motherboard crashed las month, and I replaced it with a similar one, slightly older.. I am willing to cooperate and get logs and such, if I am showed where to find them, I have never face anything like this in the previous two hackintoshing years.. Ethernet refused to work All attempts to get a working kext failed Specs are Gigabyte fsb 1066 ga-945gzm-s2 Intel Core 2 Duo E8500 Nvidia GeForce 6200 Due to the Nvidia Graphics card I need to use npci=0x3000 flag to get it to boot. Perhaps this is why none of the lan cards do not work? In this case, I shall need a video card replacement.. I have only installed kexts using pkg files (the least mpkg) or copy/past into the Clover kext folder in the EFI partition, so I need to learn the other way to install them as well.. The old motherboard crashed las month, and I replaced it with a similar one, slightly older.. Ethernet refused to work Nikto-nse 1 0 for mac With this app, you can update urban and rural maps, register your device, update software and even backup your data..
